Handwerkstrasse 15
70565 Stuttgart, Germany

A Mix of Methods for a Better Safety Culture

www.dekra.com/en/newsroom

- New requirements for learning processes in occupational health and safety too
- Digital formats such as e-learning and blended learning
- Comprehensive offering from DEKRA covering all aspects of occupational health and safety

At A+A 2019 – the international trade fair for occupational health and safety and occupational medicine – in Düsseldorf, the DEKRA Academy will be showing the various ways in which employers prepare their employees for tasks relating to occupational health and safety. Between November 5 and 8, 2019, the experts will be presenting training concepts for a variety of requirements – from classroom seminars to e-learning and blended learning formats. The trend is clear: Digital learning formats are becoming increasingly popular, including for teaching employees all about occupational health and safety and safety cultures.

As digitalization advances, requirements for learning processes are changing too. Learning is becoming increasingly time- and location-independent, while technological innovations are opening up new opportunities and potential. State-of-the-art digital learning formats can be flexibly combined with other learning arrangements – a format known as “blended learning.” This means that courses can be more targeted, for example through classroom seminars, webinars, smartphone apps and the support of mentors in a learning community.

Many of the legally required annual training sessions can now also be completed online via the DEKRA Safety Web, DEKRA’s own learning platform, saving both time and resources.

To help learners use their time more effectively even when they are away from their desks, a huge amount of content from DEKRA’s own learning management system (LMS) is made available for mobile learning on smartphones and tablets.

At A+A 2019, from November 5 to 8, the DEKRA Academy (hall 10, stand D48) will be showcasing its comprehensive range of seminars covering all aspects of occupational health and safety including fire safety, SCC, first aid, warehouse logistics, electrical and electronic systems, construction machinery and cranes as well as the methods used for training employees to be safety officers or specially authorized persons. The training sessions encompass a range of learning methods:

Date Stuttgart, October 5, 2019 / No. 110

E-mail Tilman.voegele-ebering@dekra.com

- **E-learning:** Web-based training (WBT) and computer-based training (CBT) – for example, qualification in accordance with the Safety Certificate for Contractors (SCC).
- **Blended learning:** Seminars comprising e-learning and classroom-based modules – for example, training employees to be safety officers or perform risk assessments.
- **DEKRA Safety Web:** Online platform on which employees can receive training via e-learning or blended learning on their PC, tablet or smartphone – for example, vehicle training or load securing instruction.
- **Classroom-based training:** Covering all aspects of occupational health and safety – for example, forklift training or training employees to be fire safety officers.

DEKRA at the A+A Congress 2019: “practical and interactive”

DEKRA experts will be in attendance at the A+A Congress 2019. On October 6 and 7, 2019, a new practical and interactive format will offer an additional way for experts to get talking to each other. DEKRA will be organizing two themed islands:

- The first, which is scheduled for Wednesday, November 6, from 10 a.m. to 12:30 p.m. in the CCD South foyer (second floor, location 5), will focus on psychological health awareness and look at the embedding of psychological risk assessments in workplace health management.
- On Thursday, November 7, the focus will be on Workplace 4.0. Together with its partner DearEmployee, DEKRA will be discussing the benefits of digital psychological risk assessments. This event will also take place from 10 a.m. to 12:30 p.m. in the CCD South foyer (second floor, location 5).

About DEKRA

DEKRA has been active in the field of safety for more than 90 years. Founded in 1925 in Berlin as Deutscher Kraftfahrzeug-Überwachungs-Verein e.V., it is today

one of the world's leading expert organizations. DEKRA SE is a subsidiary of DEKRA e.V. and manages the Group's operating business. In 2018, DEKRA generated sales totaling more than 3.3 billion euros. The company currently employs more than 45,000 people in approximately 60 countries on all six continents. With qualified and independent expert services, they work for safety on the road, at work and at home. These services range from vehicle inspection and expert appraisals to claims services, industrial and building inspections, safety consultancy, testing and certification of products and systems, as well as training courses and temporary work. The vision for the company's 100th birthday in 2025 is that DEKRA will be the global partner for a safe world.
