

Press Release

DEKRA at Automotive Testing Expo 2022 in Stuttgart

One-stop shop for expert services

- Labs focusing on e-mobility and connected vehicles
- Test sites in Málaga, Spain, and Klettwitz, Germany
- Interactive VR application showcases portfolio at DEKRA Lausitzring

After a break due to the pandemic, the Automotive Testing Expo Europe will be making its comeback in Stuttgart, Germany, from 21 to 23 June. Along with its sister shows in the United States and Asia, it is the leading international exhibition for automotive testing, development, and validation technologies. As one of the leading international testing service providers, DEKRA will be back at the trade show in Stuttgart this year.

DEKRA offers a wide range of services for the automotive and automotive supply industries. These include design verification testing and complete vehicle validation, type approval and homologation compliance testing, as well as material, component, EMC and RF testing in the product and component segments. The organization focuses on the vehicles and transportation services of the future, with a particular emphasis placed on automated and connected driving as well as e-mobility services.

DEKRA's large number of laboratories and testing locations – including in the Netherlands, in Germany, Spain and the United States as well as in Asia – with each having its own focus. The Technology Center at the DEKRA Lausitzring specializes in testing and homologation for automated vehicles. The DEKRA site in Málaga, Spain, is notable for its unique expertise in the field of wireless communication, which also provides the foundation for connected driving tests. DEKRA's competence center for charging infrastructure and EMC vehicle testing is located in the Netherlands and the laboratories in Asia provide a wide scope of services. The international network of testing locations for connected, automated and electric vehicles offers DEKRA's customers a one-stop shop for the organization's comprehensive services.

The highlight of DEKRA's appearance at the Automotive Testing Expo (Hall 8, Booth 8134) is an interactive 3D model of the state-of-the-art test tracks at the DEKRA Lausitzring. DEKRA acquired the racetrack in November 2017 and it is now part of Europe's largest manufacturer-independent inspection and testing center for automated and connected driving.

The ADAS & Autonomous Vehicle Technology Expo will be running parallel to the Automotive Testing Expo at the Messe Stuttgart exhibition center. And DEKRA will be there to provide a specialist presentation. As part of the conference program on the third day of the event, Thomas Jäger (Senior Vice President and Head of Technical Service Management in the Product Testing Service Division at DEKRA) will speak about the latest developments in V2X technology and the current regulatory and certification situation. He will also discuss the testing requirements associated with connected and automated driving.

About DEKRA

DEKRA has been active in the field of safety for almost 100 years. Founded in 1925 in Berlin as Deutscher Kraftfahrzeug-Überwachungs-Verein e.V., it is today one of the world's leading expert organizations. DEKRA SE is a subsidiary of DEKRA e.V. and manages the Group's operating business. In 2021, DEKRA generated sales totaling more than EUR 3.5 billion. The company currently employs almost 48,000 people in approximately 60 countries on all continents. With qualified and independent expert services, they work for safety on the road, at work and at home. These services range from vehicle inspection and expert appraisals to claims services, industrial and building inspections, safety consultancy, testing and certification of products and systems, as well as training courses and temporary work. The vision for the company's 100th birthday in 2025 is that DEKRA will be the global partner for a safe, secure and sustainable world. With a platinum rating from EcoVadis, DEKRA is now in the top one percent of sustainable businesses ranked.
