Press Release

DEKRA approved as the first CTIA™ Authorized Testing Laboratory (CATL) for CTIA™ Cybersecurity Certification Test Plan for IoT Devices in Europe

DEKRA Testing and Certification, S.A.U. has been recognized by CTIA™ as a CTIA Authorized Testing Laboratory (CATL) for CTIA Cybersecurity Certification Test Plan for IoT Devices, providing additional security capabilities to the whole IoT ecosystem. These services are designed for IoT devices that connect to at least one network to exchange data with other devices, vehicles, home appliances or infrastructure elements.

CTIA manages a cybersecurity certification program for Internet of Things (IoT) devices, establishing an industry baseline for device security on wireless networks. The CTIA IoT Cybersecurity Certification Test Plan supports a variety of use cases and has three levels. The first level identifies core IoT device security features, whereas the second and third levels deal with security elements of increasing device complexity, sophistication and manageability.

 "We are very proud and satisfied having obtained the recognition from CTIA as CTIA Authorized Testing Laboratory, being the first recognized laboratory in Europe." says Fernando E. Hardasmal, Executive Vice President and Head of Service Division Product Testing at DEKRA. "This new service increases our cybersecurity testing and certification portfolio for IoT devices, which DEKRA continuously develops".

"The new recognition places DEKRA as one of the leading companies for cybersecurity testing and certification for connected devices and offers our clients not

only the ability to test, but also to profit from our extensive experience in cybersecurity projects." says José Emilio Rico, Head of Cybersecurity at DEKRA Testing and Certification, S.A.U.

DEKRA offers a wide scope of cybersecurity services for different market segments and IoT device manufacturers. Tailored cybersecurity testing with vulnerability analyses, penetration testing, privacy and security evaluations are some of the main services provided to customers at the moment.

About DEKRA

DEKRA has been active in the field of safety for more than 90 years. Founded in 1925 in Berlin as Deutscher Kraftfahrzeug-Überwachungs-Verein e.V., it is today one of the world's leading expert organizations. DEKRA SE is a subsidiary of DEKRA e.V. and manages the Group's operating business. In 2018, DEKRA generated sales totaling more than 3.3 billion euros. The company currently employs more than 45,000 people in approximately 60 countries on all six continents. With qualified and independent expert services, they work for safety on the road, at work and at home. These services range from vehicle inspection and expert appraisals to claims services, industrial and building inspections, safety consultancy, testing and certification of products and systems, as well as training courses and temporary work. The vision for the company's 100th birthday in 2025 is that DEKRA will be the global partner for a safe world.
