Testing laboratories DEKRA Shanghai and DEKRA Guangzhou have both been ENEC approved for the category LITE. ENEC is a European Mark for electrical products which demonstrates conformity with European safety standards. The scheme complements CE marking by validating compliance independently. DEKRA is one of the first certification bodies to achieve ENEC approval for its Chinese laboratories.

ENEC is the high quality European Mark for electrical products which demonstrates compliance with European standards (EN). With the passing of the ENEC assessment for both the Shanghai and Guangzhou locations, testing for ENEC certification can now take place on multiple locations in China. This helps China-based manufacturers of products or components export more easily and more quickly to the European Union. In addition, manufacturers based in China can now test and certify locally without having to ship their products abroad.

ENEC certificates not only give access to many markets in the European Union, but to the European Free Trade Association (EFTA, under which fall Switzerland, Norway, Iceland, and Liechtenstein) as well and increasingly to Eastern Europe. It gives manufacturers the assurance that an independent testing body has verified that products comply with the relevant standards. ENEC certification is relevant for manufacturers of LITE products and components, amongst which are lighting components, luminaires, lamps and LED lighting, drivers, and control units.

The DEKRA labs in Shanghai and Guangzhou focus on offering localized testing and certification services to local customers with a high quality and differentiated one-stop service concept. Next to ENEC certification, the DEKRA Shanghai and Guangzhou laboratories provide customers with comprehensive certification schemes, such as CE, CB, EMC, GS, MET and other conformity markings to meet their needs on the global market. The lab in Shanghai has also been approved for ENEC+, the marking for performance specification according to the ECS scheme.

About DEKRA

DEKRA has been active in the field of safety for 90 years. Founded in 1925 in Berlin as Deutscher Kraftfahrzeug-Überwachungs-Verein e.V., it is today one of the world's leading expert organizations. DEKRA SE is a subsidiary of DEKRA e.V. and manages the Group's operating business. In 2016, DEKRA generated sales totalling approximately 2.9 billion
